

## AmeriXan – Liquid Xanthan Gum

### Description

AmeriXan is a suspension containing 100% high purity Xanthan Gum biopolymer suspended in a BTEX free white oil. AmeriXan only uses high quality polymers and the highest quality suspension. This provides a stable suspension with both quality and consistency.

AmeriXan is a versatile product and can be used in most types of water-based fluids for rheology modification, hole cleaning and solids suspension. It is useful in applications with a wide range of pH, temperature and salinity conditions.

Type:	Viscosifier
Appearance:	Tan Suspension
Odor:	Hydrocarbon
Temperature:	275°F
Applicability:	Fresh and Brine Fluids
See Also SDS	

### Advantages

- Highest quality polymers provide high yield and consistency.
- Superior suspension provides industry leading shelf life.
- Suspended in an environmentally friendly BTEX free white oil.
- Quick and easy dispersion and hydration eliminates fish-eyes.
- Useful in a wide range of pH and salinity.
- Compatible with all anionic and nonionic surfactants.

### Applications:

For use as a viscosifier in fresh or brine fluids. Dosages vary depending on temperature and water characteristics. Typical dosages in Xan applications range from 2-10 gallons per thousand.

### Packaging, Handling & Storage

Packaging: 275 gal tote, 55 gal. drum, 5 gal bucket. Prices vary upon packaging type.  
Storage: 6 months in original unopened drums/IBC.
